A REPUTATION FOR QUALITY

Considered among the world's highest-quality and most beautiful appearance grade wood products, Canfor's WynnWood boards and line of premium paneling make it the top choice for high-end builders for many applications and projects.

The product grades supersede NLGA grades with less wane and strict limits on blue stain and end splits.

INCOMPARABLE FIBRE QUALITY

Sustainably harvested in the beautiful southeastern interior of British Columbia, Canada, all WynnWood boards and premium paneling are manufactured from the finest Engelmann Spruce and Lodgepole Pine. This fibre is certified to the PEFC chain of custody standard. WynnWood boards and paneling showcase sound tight knots, exceptional tight grain pattern with consistent coloration for a bright and appearance to suit any architectural style.

SUPERIOR FINISH QUALITY

Processed with state-of-the-art moulders, WynnWood premium paneling is finished to the highest standard in the industry offering a four sided ready-to-use satin-like finish. The result is an exceptionally smooth surface giving the product a near sanded look and feel making it easier to accept stain and finishes without raising the grain.

INCREDIBLY VERSATILE

Because WynnWood Premium Paneling is dried slowly and with care to a low moisture content, it's an incredibly stable product, relatively unaffected by changes in humidity after drying making it ideal for paneling that requires tight-fitting T&G joints. Premium paneling is an excellent choice for various applications such as interior walls, ceilings, and soffits. Premium paneling takes stain and paint easily and provides a wide variety of design and finish options.

For the rich, warm, unmistakable look of real wood, there is no better choice than WynnWood Premium Paneling.

**SUPERIOR-QUALITY PANELING
TIGHT GRAIN FIBRE**

**EXCEPTIONAL DIMENSIONAL STABILITY
SUPERIOR SURFACE FINISH QUALITY**

**EXCELLENT STAINING PROPERTIES
EASY TO NAIL AND APPLY FASTENERS**

Canfor's WynnWood operation produces some of the world's highest quality boards known for their exceptional dimensional stability and surface finish. The Engelmann Spruce-Lodgepole Pine boards and premium paneling are ideal for new construction as well as DIY and renovation projects. Our sustainable wood panels make it a top choice for custom and high-end builders seeking premium products for any architectural style for their applications.
