

# Prince George Pulp Mill

## Environmental Product Declaration Sheet 2018

### Mill Location:

Prince George, BC, Canada

### Product Description:

160,000 admt/yr Premium Unbleached Softwood Kraft Pulp

### Process Description:

TCF - Unbleached - Ultra Clean

### Bleaching Sequence:

WW

## FIBRE SOURCING/SUSTAINABILITY

All fibre is harvested from sustainable forestry operations in the Prince George region. 100% of the fibre comes from non-controversial forests. 87% of the fibre is certified to sustainable forestry standards. Canfor Pulp has agreements in place with all our fibre suppliers to ensure that no protected or conservation areas are harvested. In addition, all of the harvested areas we source from have been assessed as low risk under the FSC Controlled Wood system. These procedures are audited by internal and external auditors annually.

## SPECIES

**Lodgepole pine** – Pinus contorta  
**White spruce** – Picea glauca  
**Sub-alpine fir** – Abies lasiocarpa

## CERTIFICATIONS

FIBRE	Certification #	Expiration Date
PEFC Chain of Custody	KPMG 2563	March 1, 2022
FSC Chain of Custody	KF-COC-001056	August 17, 2018
FSC Controlled Wood	KF-CW-001056	August 17, 2018

## QUALITY & ENVIRONMENTAL

ISO 9001:2015	KPMG 2658	April 19, 2018
ISO: 14001: 2015	KPMG 2658.01	April 13, 2018

## FOOD GRADE

ISEGA	Regulation (EC) No1935/2004-Food Contact	April 20, 2019
ISEGA	Decree on Tobacco Products-28 June 2010	April 20, 2019
US-FDA	21 CFR 176.170 / 176.180 / 186.1 /186.1673	2018
CHWA	GB 4806.8 - 2016	2018

## COMPLIANCE WITH INTERNATIONAL STANDARDS

Pulps are fully compliant with the requirements of the US Lacey Act, EU Timber Regulations, the Australian Illegal Logging Prohibition Act and REACH.

**GREENHOUSE GAS EMISSIONS:** 314 kgCO<sub>2-e</sub>/admt

**RENEWABLE ELECTRICITY:** 100% of the electricity required for pulp mill operations is biomass renewable energy generated by the mill from regional sawmill residuals.

**ENERGY EFFICIENCY:** 43.0 GJ/admt of which 88% is from renewable biomass energy.

Water Emissions		2017
	<b>Acute lethal toxicity</b> (rainbow trout, daphnia magna)	None
	<b>BOD<sub>5</sub></b> (kg/admt)	3.9
	<b>AOX</b> (kg/admt)	0
	<b>Nitrogen</b> (kg/admt)	0.64
	<b>Phosphorous</b> (kg/admt)	0.14
	<b>Water usage</b> (m <sup>3</sup> /admt)	78
	<b>Total suspended solids</b> (kg/admt)	7.71

Air Emissions		2017
	<b>TRS</b> (kg/admt)	0.08
	<b>Particulate Matter</b> (kg/admt)	0.77
	<b>NOX</b> (kg/admt)	2.83
Land Emissions		2017
	<b>Solid waste land filled</b> (kg/admt)	59.6

## RESPONSIBLE FIBRE PROCUREMENT

Canadian Forest Products is the primary supplier of fibre to the Canfor Pulp mills. All of their operations are required to comply with Canfor's Environmental Policy and Sustainable Forest Management Principles, as well as with provincial and federal legislation and regulations. All Canfor forestry operations in British Columbia have an Environmental Management System registered to ISO 14001 and are certified under PEFC.

**We ensure our fibre supplies originate from areas of low-risk sources, and ensure they are not sourced from any of the 5 requirements below:**

- Illegally harvested wood
- Wood harvested in violation of traditional and human rights
- Wood from forests in which high conservation values are threatened by management activities
- Wood from forests being converted to plantations and non-forest use
- Wood from forests in which genetically modified trees are planted

**CANFOR PLANTED 67 MILLION TREES IN 2017, ALMOST 3 TREES FOR EVERY TREE HARVESTED.**

## CANFOR PULP INNOVATION

Ultra-responsive to Canfor Pulp's customers and mills, Canfor Pulp Innovation (CPI) is staying abreast of technology and developments by working with both industry and academic partners through an Open Innovation program.

Unique among Canadian NBSK producers, we provide customers with rapid responses to their inquiries and direct access to our evolving capabilities including our latest technical insights and expertise – knowledge our customers and industry can benefit from and leverage to their advantage.

## FOOD GRADE CERTIFICATIONS

All of our pulps are manufactured and rigorously tested by independent labs to ensure the pulps meet Food Grade Standards including the US FDA, European Standard (ISEGA) EC No. 1935/2004, and China food contact regulation GB 4806.1 - 2016.

2010 CCD-003: Renewable Low-Impact Electricity

## LEADING SAFETY CULTURE

With safety as the number one priority, Canfor Pulp strives to improve its safety culture and performance to ensure employees and contractors can work in a healthy and safe workplace.

Safety Performance	2017	2016	2015	2014	2013	2012
Medical Incident Rate	2.12	2.29	2.12	2.43	2.63	3.12
(incidents/200,000 hrs)						

## SUSTAINABILITY

To support Canfor and Canfor Pulp's commitment to sustainable operations, the companies produce a joint annual sustainability report that provides significant details about the One Canfor sustainability performance. The report includes details on our social, economic and environmental values. Both our 2015 and 2016 reports were recognized by the Finance Sustainability Initiative as the Best Sustainability Report in the Renewable Resources & Alternative Energy category.

## CLIMATE CHANGE

Canfor Pulp has reduced GHG intensity by 37% since 1990.

## ECOLOGO CERTIFICATION

All Canfor Pulp biomass energy plants are certified to EcoLogo environmental standard CCD-003 Renewable Low-impact Electricity Products.

## RENEWABLE ENERGY

Canfor Pulp has made significant capital investments in renewable electricity generation and generated 951,347 MWh in 2016 (enough to power 113,000 homes).

## RENEWABLE ELECTRICITY GENERATION (MWh)
