MAP OF OPERATIONS - USA

In demand around the globe, our southern US operations complement our Canadian solid wood product offering with superior Southern Yellow Pine (SYP) lumber, boards and pattern stock.

Canfor SYP products come from areas known to produce some of the cleanest, densest and strongest wood in the world.

Our eleven US mills allow Canfor to offer more products and to improve our ability to serve our valued US customers.

Renewable. Sustainable. Grown by the power of the sun.

Choose Canfor and expect quality products that deliver consistent performance. Benefit from our consistent and dependable performance in supply-chain management and logistics support.

Feel confident in choosing an environmentally preferable choice with Canfor as one of few primary lumber manufacturers to offer products certified to all of the independent certification programs in North America.

Know that you've selected a truly customer-focused company that continues to stretch its boundaries to better serve our valued customers worldwide.

Work with a global team that takes pride in our unwavering commitment to excellence, safety, customer satisfaction and upholding our reputation for quality products.
