

## Polar Premium White™ Liner

### End Uses:

A fully bleached white top alternative for direct print, litho laminated and preprinted corrugated packaging applications. The superior strength and smoothness properties provide excellent printability and yield savings.

### Fibre Source

British Columbia's northern forests produce some of the finest trees and fibre available for paper. The ideal climate encourages slow growth of white spruce, lodgepole pine and alpine fir. These trees produce cellulose fibres that are long, slender, flexible, and strong - providing an excellent furnish for kraft paper production. The readily collapsible thin cell walls of Canfor Pulp's fibres form ribbons with an exceptional surface area - promoting optimum fibre to fibre bonding for superior strength.

### Typical Values – Metric (1924-3)

Basis Weight		g/m <sup>2</sup>	65	80	90	100	105	125	150	Test Method
